

OUR DEAREST IMMANUEL FAMILY !...**you are SO close to our hearts but far away to visit:(**

So... Here **we** are again with a short note to thank **each one** for **your** generous gifts of support that **you** send to **us** ...Please know that without each of **you**...it would be hard to do what **we** do without **your** generous spirit of giving!!! So in this Season of Thanksgiving **we** just want to say all this from **our** hearts!!

I wish that **we** could share our most unbelievable weather with **you**! 80 degrees and here it is the 20th of November 2020! **We** are grateful! Our bones don't ache as much and **we** are able to enjoy the out of doors more! No camping again this year :(But **we** do have **our** mountains close by to admire and thank God for the beauty of His creation! Arizona sunsets are hard to beat!

We are thankful for family! **We** have had recent visits with 2 of **our** granddaughters and then a surprise return from **our** Grandson Austin, who finished his basic training and avionics school early at Shepard Air-force Base in TX, They only had 4 students and all did well and were dismissed to go back to their homes! What an unexpected evening at the Dye home,!! Full of joy and thankfulness to God for **our** family here and how thankful **we** were for God keeping him safe and helping him thru his training. Covid made it rather boring for him and the others, as they weren't allowed to go off the base. But it was the best way to keep the young men safe and healthy! Also...We get to talk often to our **daughter** in Tucson who is **very** ill now :(and then we talk often to our **son** in Wisconsin who is moving into a new to them home as well!

Tho the prison has not yet opened to us...We continue to minister to needy folk and also Paul has been able to finish many projects right in the confines of our very own garage! It is simply amazing what this man can do and put together when it looked so impossible at first! He made and upholstered seats for an aircraft. Also..The Chiropractor told him to use an inversion table for his back and leg pain but because it is too short, he is putting on an extension...just like that! I am SO thankful for my husband and his God-given abilities! Also for his love for **me**! **We** are ministering to so many widows here in this area,so I am constantly re-minded just how blessed I should be to still have **my** husband who celebrated his 80th birthday this October with balloons-with friends- and with family!! He continues to do jobs for others and speaks at several meetings. God has brought company to us (and of course that is **my** part in being given to hospitality :) and Paul continues to share about how God has worked on **our** behalf. The story of his Father and the other 4 men that gave their lives so many years ago, to reach the lost tribe in Bolivia, comes up often in Paul's conversations with **our** visitors and friends and though that story didn't have a happy ending...God has used it to bring Glory to Himself! **We thank God** for the heritage He has allowed **us** to be a part of...

Well...I shall close on this note... I trust that each of **you** as well, will be full of thanks for all that God has done on **your** behalf. We don't need a holiday called Thanksgiving to be thankful, but when things look especially dire, and it is tough to muster up a whole lot of gratitude,We sometimes need help turning our frown upside down ! So may my virtual hug be a means to encourage **you**...**as you have encouraged us!** Covid or not...God is Good! "Praise the Lord. **Give thanks** to the Lord for He is good; His love endures forever." (Psalm 106:1)

We are thankful for our country and so we voted and continue to pray for it!

~ **PAUL & PAT DYE** ~
