

Many people recognize the term 20/20 for the same reason that we recognize 98.6 and 120/80. Twenty-twenty is a phrase used to express good vision. If you have 20/20 vision, you can see clearly at 20 feet what should normally be seen at that distance. If you have 20/40 vision, it means that at 20 feet you see what a person with normal vision is able to see at 40 feet.

God Himself is our highest treasure. The more clearly we see that truth, and love that truth, the more we will live in that truth. A person who identifies God as the greatest treasure will live differently than a person who believes that possessions are the greatest treasure. A person with undistorted vision will give up everything else in order to have Christ.

The year 2020 is upon us, and we are praying that God would give us clear vision to see Him for who He is. We want to have a passion in the new year to spend our time and energy to the glory of Christ. We don't want to putz around, or mindlessly go through the motions; we want to devote ourselves to make Him look as great as He really is.

Christmas greetings to you, and let the New Year be filled with a strong vision for Christ-exalting living,

Paul
